LOCAL ITEMS.

District Court-Fuller, Judge.

SATURDAY, Aug. 16. In the case of G. W. McKinney, charged with the murder of Morgan Courtney, alias Rick Moriarty, the detendant pleaded not guilty, through his attorneys, Bishop & Sabin. His case was set for trial September 10. J. S. Pitzer was added as attorney for the proscention.

State vs. K. J. Hanley, charged with

State vs. K. J. Hanley, charged with embezzlement. The defendant was ordered to plead on Monday.

In the cases of the State vs. Rosa. Stein and the State vs. David Leaby, demurrers were submitted by the defendants. The demurrers were overraled, and the defendants excepted. Both were ordered to plead on Monday.

C. H. Light vs. Floral Mill and Mining Company. Default opened, and judgment

Surface, \$75.40; average, \$254.34; selected, \$889.78. The ledge has been laid open for a distance of over 150 feet, and a hole has been sunk to the depth of 15 feet. In the richest portions of the ledge, it is only from four inches to a foot in width; but in other parts, where there is good paying ore, it is from three to five feet wide. This is certainly a good prospect.

HEALTHY .- Pioche must be a healthy place, at least such is undoubtedly the opinion of an ancient Mexican, whose immediate ancesters all dried up and blew away to Southern California, and who confided to us that he had been sub-sisting on red-peppers and Pioche whisky, and sleeping in the graveyard for the last three weeks. Said he, "There is no show for me here; I must return to the land of my youth, where I too, may blow away and be happy." And lighting a cigarette he gracefully "blew a cloud" and faded into the blue ether. "It is an ill wind that blows nobody good."

BENEFIT OF MR. DUDLEY .- Friday evening is the time selected and Hanley's Hall the place chosen for the benefit of Wm. Dudley, attached to the Bella Bird Troupe. The piece which will be pre-rented on the occasion is the 5-act ro-mantic drama entitled "The Sea of Ice." The play has never failed to have a run wherever produced. It has never been presented here, and as it is to be put upon the stage with entire new scenery, it will doubtless afford those who attend the theater on Friday evening a pleasant

Some crazy Englishman purposes making a telescope of sufficient power to enable one to see human beings on any of the planets. This may be all well enough in the interests of science, but how shocking it would be to a Pioche rough to see a man strutting through the streets of some town on Venus or Mars without being able to put a head on him!

Hopes or Recovery .- Thomas Hyde, who was severely injured in a mine one day last week, is now, we are happy to say, in a much improved condition. The paralysis of the limbs is not so complete as it was at first. His family and friends ade hopeful of an early recovery.

SERVICES AT THE EPISCOPAL CHURCH .-Morning service at 11 o'clock. Sunday school at 2 p. m., and evening service at eight. Hereafter the first bell will ring one half hour before the beginning of each service, the second bell just be-fore the beginning fore the beginning of service. Henry L. Badger, Rector.

NEW RESTAURANT. - M. Baptiste Coquild, a noted French cook just from New York, is refitting the building form-erly known as Lagrue's Restaurant, and will soon claim public patronage.

I. B. Scorr and S. B. Bell left Hamilton yesterday for Pioche.

LOCAL MINING REVIEW.

For the week Ending August 16, 1873 During the past week there has been litte change in the mines of Ely District. One discovery has been made, however, which promises to be a valuable one to

in another column. A "rich strike" in one of the old mines has also been reported, but as we have no good reason to believe the said "strike" to have been made we do not propose to make a sensational article of When we hear of a rich strike we want to know something of it before we give it to the public as a fact. We don't want any "rich strike;" we want steady. dividend-paying, or at least self-supporting mines. And we have every reason to believe that ere long there will be many more such in Pioche than there are now.

AMERICAN FLAG. Sinking the shaft rapidly on the vein, which is the full width of the shaft, and which is the full width of the shaft, and showing a fine streak of ore on the foot wall, with bunches of good ore scattered through the whole of the vein matter. Working three shifts. Also drifting east and west from the 7th station, on the vein, which shows excellently in both drifts, the ore being fully equal in quantity and quality to that in the shaft. Shipped, on the 15th inst., by Pritchard's fast freight, 18 bars of bullion, valued at \$9,183.65, and yesterday, by Wells, Fargo & Co.'s express, \$4,000 more, making \$13,183.65 for the past week. The company's mill is still running on Newark ore, and working it to a high per centage, as usual, but will shortly be put to work on their own ores, when the bullion product will be increased proportionately. PAGE AND PANACA.

The winze is now one hundred and two feet deep, below the 360 foot level, hav-ing been sunk twelve feet during the week. The water continues to prove a great source of annoyance, caus-ing the sides of the winze to cave in many places, and necessitating very thorough timbering as fast as the ground is opened. More ore is showing itself, and the indications altogether are of a favorable char-acter. Working the same force as last

INGOMAB. The face of the drift on the 575-foot level shows a marked improvement over our last report. The vein is larger and the ore of a higher grade. Have taken out more ore last week than for a long time previously. Employing the usual number of men.

CHIEF OF THE HILL. The main shaft is now down 310 feet below the level of the Burke tunnel, and sinking goes on night and day. A pro-gress of 25 feet has been made during the past week in the west drift of the 210 foot level, with two shifts working. The stopes are looking as well as usual. There are now on the dump 84 tons of ore, and a small quantity is taken out daily.

WASHINGTON AND CREOLE. No material change to note. Work going on as usual.

HAVAKA. coarse in the web to stop the career of a frightened rabbit. Once more in shame and diagust, we repeat the question.

The ore at the bottom of the shaft is now the best that lims as yet been found.

Coarse in the web to stop the career of a frightened rabbit. Once more in shame and diagust, we repeat the question. "Where is the Indian Agent?"

A SAD SIGHT.—Intermeperance is a ter-MONTANA.

Have not cut the vein yet on the 173foot level. We learn that a new contract is to be let this week, which must cer-

SPRING MOTNTAIN TUNNEL. Work of sinking continues on ledge No. 3, with no new developments to note since last week, in consequence of the vein having dipped away from the shaft, which, however, is not regarded as of any consequence as it will no doubt soon resume its course again at a greater depth.

No change in the appearance of the mine. The usual number of men are employed and about the same quantity of ore is being taken out. The ore is now accumulating rapidly on the dump. MEADOW VALLEY.

The repairing in No. 5 is nearly finished. No. 7 is at work as usual. No developments of importance last week. The new hoisting worke of the company will be put to work about the 20th of this

month. HAYMOND AND ELY. Between sixty and eighty tons of ore are taken out and shipped daily. No note of interest to make.

SOUTH SIDE. No new developments last week. MAZEPPA.

No change. Sinking on the main shaft ALADDIN

Nothing of interest has occurred in the CAROLINK.

The new hoisting works, just completed, will begin work on Monday next. CHIEF EAST EXTENSION.

This mine is looking as well as usual. Work is going on without any change to PROCEET PRENTY.

Running along as usual with nothing IVANHOE.

A contract for sinking 100 feet having been let, the work on it began on Friday.

Bristol District. SULTAN.

The vein in the bottom of the shaft is all ore, and is evidently improving in quality, as recent assays show. Two or three days ago some very beautiful specimens were extracted from this mine. We were shown one by Mr. Sultan yesterday. It resembled a bowl of chalcedony, perhaps ten inches across, and filled with glittering ore. It was one of the most remarkable specimen of its kind that we have ever seen. kind that we have ever seen. CAVE.

winze is being steadily sunk, and the tunnel run towards the point of intersection. Taking out the usual amount of ore, and working the same number of hands as at date of our last report.

THAT Charley Wiederhold's is the place par excellence to get choice, spicy and entertaining reading matter, we suppose no Piochian will deny. Should such a benighted individual exist the col-ums of the Excont are open to him to refute our assertion to the contrary (on paying twice the usual advertising rates and treating the compositors).

THEATER.—The performance last night was unavoidably postponed.

Conl from Kanarra.

Messrs, Poliock and Turner, represent ing a consolidation of a number of unincorporated interests in the neighborhood of Kanarrs, Utah, under the name of the Kanarra Coal Company, arrived in town yesterday with seven tons of coal from the discoverers. A notice of it is given their mines. They distributed it around among the different blacksmiths, all of whom give it their unqualified commen-dation; and in the shop of the Raymond

dation; and in the shop of the Rsymond & Ely it was tried in some very heavy forcing, with the following result:

Samuel Pollock—Sir: The sample of stone coal you left at the Rsymond & Ely blacksmith shop to be tested has proven entirely satisfactory; much better than any Utah coal ever before brought to this market.

You can deliver what you have with

this market.
You can deliver what you have with you at this shop. Respectfully,
T. J. Andrews,
Foreman Raymond & Ety.
It is the intention of these gentlemen to make arrangements at an early day to establish a coal-yard in Pioche and keep a supply on hand equal to every demand. The extensive character of this coal de-The extensive character of this coal de-posit warrants them in their assertion that they can do this to any conceivable extent, for they assure us they have al-ready opened the vein in three places, and nowhere is it less than twenty feet thick. In one place they have run a tunnel in seventy feet to find the charac-ter of the coal improving as they are ter of the coal improving as they go in. The mines are within four miles of Kan-narra in the Wasatch range of mountains.

Whalen, who resides just above McCannon street, we learned last night of the pitiable plight of a poor old Indian, who, abandoned by his tribe, has for the last four days been lying on the mountain side, some distance above the Courthouse. Mr. Whalen took him some water yesterday afternoon, but he was hardly able to swallow, and pointed to his eyes, intimating that he was going blind. He is nearly naked. Mr. Whalen says he has known the Indian for the last three years, and that he has always been an industrious, hard-working fellow. It is needless to comment on the heartless conduct of the Indians. We who live on the frontier know their who live on the frontier know their who live on the frontier know their habits—that they have less pity for the aged sick than for the beasts of the forest; but there is some one whose conduct needs comment, and that of the harshest kind. Where is the Indian Agent? Where is the reverend purveyor of rotten bacon on the banks of the Muddy? How long since his sainted presence has gladdened the fading eyesight of the starving wards of Government entrusted to his care? Memory falls us when we seek the answer. Government entrusted to his care? Memory fails us when we seek the answer. But the answer we demand if to the question of how long shall these things be? How long shall an outraged people be exhorbitantly taxed to pay annuities to the Indians, to give them the means of providing themselves with a decent subsistence, and then see the money squaedered in every possible manner except the legitimate one, while the poor Indian is paid in stinking hog meat that would poison a coyote, and blankets to coarse in the web to step the career of a frightened rabbit. Once more in shame

rible evil-the sight of one of the noble sex-his manhood blasted-his reason gone-as he passes by with bloated countenance and tottering gait, a victim to the demon of alcohol, is a sufficiently sad sight, even in our frontier community, when the best and ablest are too often votaries at the bacchandian altar, a beside to make angels weep; but we be below to make angels weep; but we below to make angels weep; but we below to be be be below to be be be below to be be below to be be below to be be below to be be be below to be be be below to be be below to be be below to be be be below to be be below t since and the defendants excepted. Both were ordered to plead on Monday. C. H. Light vs. Floral Mill and Mining Company. Default opened, and judgment set aside upon the defendants paying casts of motion. By consent of counset the answer in the case.

The Court adjourned till Monday at 10 is. In.

New Mine.—A ledge, the prospects of which give much hope to its owners, has lately been discovered in this district, in the mineral belt west of Pioche. The locators and owners of the mine are Messrs. Jas. Spaulding, John Nelson and H. W. Donglas. The ore, as assayed yesterday, gave the following results:

Since is wees, in consequence of the shaft, where with shaft as fast as possible, and the shaft as fast as possible, and with the shaft as fast as possible, and with the shaft as fast as possible, and the defendants excepted. Both were ordered to plead on Monday. C. H. Light vs. Floral Mill and Mining Company. Default opened, and judgment resume its course again at a greater depth.

BROOKLYN.

Commenced drifting Friday on the ledge from the bottom of the winze, at the depth of 60 feet. The ledge is 2 feet wide of excellent ore—better than they have ever before taken out. We look for something good in the Brooklyn this week.

SILVER PEAK.

A little more ore was taken out last week than the week before. The mine is looking well generally. The workmen are sinking the shaft as fast as possible, and the work of the mine are depth. And the prospects of the mine are depth.

We Donglas. The ore, as assayed yesterday, gave the following results:

Surface, \$75.40; average, \$25.434; see leading the prospects of the mine are provided to the prospect of the strain community of the far East, where wrapped in their mantle of self-where were predicted to regard the from the winzer at the depth of 60 feet. The ledge is 2 feet wide of excellent ore Oh! Mothers; let this incident inspire you with a renewed determination, while yet you may, to strengthen by sorry means, that sacred love which is man's surest safeguard in the trials and dangers of after life.

> AN EXPLOSION, -About 9 o'clock last night an explosion occurred in the ravine about 300 yards below the RECORD printing office. While setting quietly in our sanctum, our attention was attracted by a sudden flash, followed immediately by an explosion as of damaged powder, for it was scarcely heard in the office. The flame caused by the explosion set fire to the sagebrash, which blazed up eight or ten feet high. It was seen from Meadow Valley street, and a cry of fire was sounded. The alarm bell struck and a wnistle on top the hill blew, the firemen made a rush for the engine and the hooks, all the saloons were emptied of their humanity, and soon the streets were filled with an excited populace. Upon learnan explosion as of damaged powder, for manity, and soon the streets were filled with an excited populace. Upon learning that no house was on fire the excitement subsided and the crowd dispersed. The explosion by which the fire was caused is supposed to have resulted from the application of a lighted fuse to some of the damaged poweder referred to in our columns the other day.

THERE were plenty of drunks "slingin around" on the streets last night.
